

PFAC Annual Report Form

Health Care For All (HCFA) advocates for health justice in Massachusetts by working to promote health equity and ensure coverage and access for all. HCFA uses direct service, policy development, coalition building, community organizing, public education and outreach to achieve its mission. HCFA envisions a day when everyone in Massachusetts has the equitable, affordable, and comprehensive care they need to be healthy.

Why complete an annual report for my PFAC?

Under Massachusetts law, hospital-wide PFACs are required to write annual reports by October 1st each year. These reports must be made available to members of the public upon request. As in past years, HCFA is requesting a copy of each report which will be posted on HCFA's website, https://hcfama.org/pfac/. HCFA recommends using this template to assist with information collection, as well as the reporting of key activities and milestones.

What will happen with my report and how will HCFA use it?

We recognize the importance of sharing of information across PFACs. Each year, we:

- make individual reports available online
- share the data so that PFACs can learn about what other groups are doing

Who can I contact with questions?

Please contact us at atappan@hcfama.org or call us at 617-275-2982.

Please email completed forms to PFAC@hcfama.org.

Reports should be completed by October 1, 2021.

33. Plea	se explain why the hospital shared only the data you checked in Q 32 above:
	We are a long-term acute care hospital and much of the data mentioned above does not apply to us.
	This year, we focused more on discussion regarding the use of technology to provide access to patient records, to allow family and friends to connect during restricted visitation and to allow healthcare providers and patients to connect via telemedicine. Discussion during PFAC meetings was more member-driven this year, as well, and included the challenges faced during COVID (patient isolation, emotional toll on patients and staff, changes made to accommodate more COVID-positive and COVID-recovering patients, etc.)
	se describe how the PFAC was engaged in discussions around these data in #32 above and any
resultin	ng quality improvement initiatives:
	Data was presented by staff. Advisors made suggestions regarding quality of care including greater access to technology as noted above in #33, focusing on enhanced communication at all levels, remembering the feelings of isolation and anxiety that are usually present for patients and families and highlighted during COVID. These comments were conveyed to the patient experience committee and will be used in future staff training.
	PFAC participated in activities related to the following state or national quality of care initiatives all that apply):
	35a. National Patient Safety Hospital Goals
