Q31. Please explain why the hospital shared only the data you checked in the previous questions:

Q32. Please describe how the PFAC was engaged in discussions around these data above and any resulting quality improvement initiatives:

PFAC members were updated on several clinical initiatives that were rolled out in FY16. -Family integration initiative: clinical/case management staffs meet with patient and family at point of admission to discuss expectations of the treatment episode. Definition of “family” is broad and can encompass any supportive other, “preferred family”, or “constructed family”. Family contact is documented in the medical record. Patients are educated about the importance of family involvement in recovery. Family is educated about services offerings, Family & Friends Programs, and additional external resources. -Motivational Interviewing pilot program: multi-disciplinary staff are trained in the MI model; increase patient engagement; and increase family involvement. Clinical staff will cull objective data (AMA rate, Program discharges, Patient satisfaction scores) to quantify results of said initiatives and interventions. -30-day Readmit Program: a multidisciplinary team approach to address the needs of this specific population. Program incorporates Motivational Interviewing, educational components so patients can better understand plans of action, and accept guidance around efficient use of resources. -2016 Legislative updates at both the state and federal level re proposed and enacted legislation re SUD treatment. -A PFAC member attended the 4th Annual PFAC Conference on June 23, 2016 and shared all information and slide decks with PFAC. -PFAC members were educated on the various opportunities for training and development that exist for professionals in the field of addiction treatment; and also noted the need to educate physicians and other healthcare professionals who would benefit from such training. Other topics included: recovery oriented systems of care, recovery coach models, and proposed MA certification specifications. *Council members were actively involved in discussion re current trends and trainings in professional education in the addiction treatment field as well as clinical initiatives and interventions on the inpatient units.
