

PFAC Annual Report Form

Health Care For All (HCFA) advocates for health justice in Massachusetts by working to promote health equity and ensure coverage and access for all. HCFA uses direct service, policy development, coalition building, community organizing, public education and outreach to achieve its mission. HCFA envisions a day when everyone in Massachusetts has the equitable, affordable, and comprehensive care they need to be healthy.

Why complete an annual report for my PFAC?

Under Massachusetts law, hospital-wide PFACs are required to write annual reports by October 1st each year. These reports must be made available to members of the public upon request. As in past years, HCFA is requesting a copy of each report which will be posted on HCFA's website, <https://hcfama.org/pfac/>. HCFA recommends using this template to assist with information collection, as well as the reporting of key activities and milestones.

What will happen with my report and how will HCFA use it?

We recognize the importance of sharing of information across PFACs. Each year, we:

- make individual reports available online
- share the data so that PFACs can learn about what other groups are doing

Who can I contact with questions?

Please contact us at atappan@hcfama.org or call us at 617-275-2982.

Please email completed forms to PFAC@hcfama.org.

Reports should be completed by October 1, 2021.

33. Please explain why the hospital shared only the data you checked in Q 32 above: At Morton Hospital, the PFAC has primarily focused on the patient experience. With the rewriting of the Charter, the committee will begin to address quality and safety in 2022.

The COVID pandemic has seriously limited opportunities for PFAC in-person engagement.

34. Please describe how the PFAC was engaged in discussions around these data in #32 above and any resulting quality improvement initiatives: At each meeting, PFAC members are invited to share community feedback on the patient experience. Their feedback provides valuable insight into identifying areas in need of improvement. This year, their feedback reiterated the importance of human interaction in the Emergency Department. The COVID pandemic had, in many ways, depersonalized care. PFAC feedback reminded caregivers of the importance of entering patient rooms, hands-on physical exams, and engaging patients in discussions concerning their care. Improving communication between patients and their health care teams has

become a priority. The effectiveness of these effort is measured in the HCAHPS and EDCAHPS surveys. These scores are reported, and trends discussed at all PFAC meetings.

PFAC members were also educated on two important initiatives in 2021 that were designed to improved care coordination. PULSE rounds is an interdisciplinary approach to care coordination that allows all members of a patient’s care team to be updated daily on patient conditions, needs, and discharge plans. IRound is a tool utilized by nursing leaders to facilitate daily communication with patients and provide service recovery in real-time.

PFAC feedback also reiterates the importance of C.A.R.E.S. (Compassion, Accountability, Respect, Excellence and Stewardship) training for all employees.
